Typical Specification

JCM 230/231 Stainless Steel Stiffener

All plain end pipe connections made with High Density Polyethylene Pipe shall have an internal stainless steel 18 - 8 Type 304, minimum, stiffener. Stiffener shall have a permanent O.D., which fits into the pipe I.D. to reinforce and maintain concentricity of the pipe.

Stiffener shall be JCM 230, JCM 231 or approved equal.

JCM Tees, Spools and Fabrications are ANSI/NSF Standard 61 and Standard 61 Annex G Certified.

This typical specification, provided by JCM Industries, is a proposed guideline for use by specifying agencies to ensure significant design and material features of this product are included within the agencies' individual specifications.

Effective 07.16.10
